DustPly Plus™ -A

Dust Control

DESCRIPTION

DustPly Plus™-A is an environmentally friendly, biodegradable, non-toxic, high strength tackifier, when mixed in an aqueous concentrate. Prior to application the dry powder is mixed with water. When the solution is sprayed on the soil it forms a stable dust control matrix making it highly effective for fugitive dust control.

Aqueous solution of DustPly Plus™-A forms a wet matrix on the soil surface. When the matrix is absorbed, the tackifier binds the soil particles together. DustPly Plus™-A has superior adhesion to soil and sand for greater longevity. In addition, if the surface is fractured by occasional traffic, DustPly Plus™-A will reconstitute upon re-wetting. This reduces the frequency of a general application.

WHERE TO USE

- Road sides
- Construction sites
- Airfields
- Mines and coal carts
- Agricultural fields
- Anywhere fugitive dust is present

FEATURES AND BENEFITS
